

In 2040, we want to...
 Feel like we can get to Salt Lake or Ogden by car, train, or bus with relative ease. We want to be able to get to and from the commuter rail stops nearly as easily as we can get on the freeway. We would like to see shopping areas built around job centers so we can keep commerce localized. We know there will be increased congestion, but we think buses and other transit will help minimize it. We want to maintain high-speed roads, like freeways and wide arterials.
